Relevant Experience

Junior Frontend Developer @ PurpleBeard Training ltd

Jan22 – Present // London, UK

- Writing modern, responsive code for both intranet sites & custom WordPress sites.
- Using & writing in modern Frontend technologies (HTML5, CSS3, JavaScript ES6+ & React.js) regularly.
- Daily communication with multiple teams, helping in end-to-end apprentice & learner processes.
- Assisting in Frontend bootcamps within various cohorts at a time as a mentor to learners & assistant to the teacher.
- Assisting in both software & hardware issues, including in the smooth installation of RAM, SSDs & HDDs, as well as various operating systems for multiple company devices.

Apprentice Web Developer @ Vasave

Sep20 – Dec 21 // Croydon, UK

- Single-handedly instrumented & ensured the smooth transition from WordPress page builder (Elementor) to a working custom site (using technologies such as HTML5, CSS3, Vanilla JS, jQuery & Bootstrap 4).
- In charge of configuring & managing web hosting services & DNS for all live sites.
- Created documentation and research for team use to ensure easy reusability for future use, with technologies such as markdown, Office 365 and Google Workspace.
- Created a foundation for cross-team project management through an Agile approach, by getting project management systems such as Jira and Trello approved and used company-wide.
- Constantly ensured cost-effective solutions were understood and as a result put in place, reducing expenses on both a monthly and yearly scale.

Personal Projects

iamsergio.dev – my personal portfolio site

Completed on Feb22

- Site available on iamsergio.dev & remote repository available on https://github.com/sgarciagallego/iamsergio.dev.

Septik - a VS Code theme for the minimalist developer

Undergoing

- Not currently available on the VS Code marketplace, however, open source code available on https://github.com/sgarciagallego/Septik.
